DART Absence and Holiday Management

Business owners and managers are all too aware of the ongoing problem of organising employee holiday and managing their absences. DART has a user friendly and innovative utility that can accommodate a wide variety of holiday plans and lets you record and maintain employee absences. DART's calendar feature allows you to easily locate records and see when key people are away from the business, so you can plan accordingly.

To find out more about how easy holiday management can be with DART, call us at Cirrus on 0845 675 1500 or e-mail us at sales@cirrusit.com

Payroll Bureau Service

Outsourcing your payroll has never been easier! Cirrus is delighted to announce that we can now offer clients a full payroll bureau service. Call us at Cirrus on 0845 675 1500 or e-mail us at sales@cirrusit.com for a free quotation.

PS enterprise® Services

Cirrus provides an extensive range of services supporting all applications of the PS enterprise® product suite. Using customisation and database triggers we can get your system to more accurately mirror your business processes and in so doing take up less resources and reduce errors. A PS enterprise® system is only as good as the users input - if you are having issues with your system why not let us take a look and see if we can help you?

Our onsite training courses are tailored for your specific needs and take into account the experience and requirements of individual delegates. Call us now on 0845 675 1500 for our latest pricing!

Worth Your Salt!

Consider this when you next get your payslip and check your salary! Sal is Latin for salt and Roman Legionnaires were partly paid in salt or received an allowance to buy it. This allowance was called a 'salarium' and this is widely believed to be the origin of the modern word salary.

Over the centuries salarium's meaning changed to that of 'payment for services rendered'. Its appearance also changed gradually over the centuries, including the Anglo-Norman word 'salarie' which is pretty close to how we know the word today.

Using salt to pay someone seems rather odd nowadays but it wasn't always the cheap item we find today in supermarkets. Before refrigeration, salt was one of the main methods of preserving food, and so was vital to mankind's survival. It was both difficult to produce and expensive to buy. So that is why, when someone tells you you're worth your salt, it is quite a compliment!
